

24 December 1969

Mr. E. R. Rowley
Chairman
National Lead Company
Building

Dear Mr. Rowley:

Confirming our conversation, the Lead Industries Association will assess us approximately \$33,000 for the year 1970. This increase of approximately \$14,000 over the 1969 assessment is due to a sharp increase in their budget for Environmental Health Control. This increase in our contribution is based on an assessment of 4¢/ton of lead used for general funds and 5¢/ton for the Health and Safety program. This compares with a figure of 5¢/ton assessed for general funds in 1969.

I believe this program sound and necessary to implement and I recommend that we go along with this assessment for 1970.

Yours very truly,

HJW:GDB

H. J. Whitson
