Re: "asbestine"

Dear Mr. Kohr:

It is important that we know more than we do about the nature of the "asbestine" you use in your paint pigments. We would like to learn its petrographical and chemical composition, and such physical properties as the distribution of particle size. The specifications you use in ordering the material would be of interest, as well as knowledge as to whether the petrographical, chemical, or physical composition varies from time to time.

If you do not have this information on hand, we would appreciate getting it from your suppliers.

Very truly yours,

HWR:rms

Henry W. Ryder, M.D.
