Subj: 1994 Delaware River Monsanto Fund Budget

To: Marilyn Hartnett - A2SM

Marilyn, attached is the proposed 1994 Monsanto Fund budget for the Delaware River plant. This budget includes an additional $3,550 over 1993 spending, mainly to be spent in educational programs. Also attached is a comparison chart between 1993 and 1994 budgets.

Mainly, the additional funds would provide resources to support 1) two $1,000 college scholarships for outstanding science students at St. James High School and Kingsway Regional High School; 2) an additional $550 to Logan Township Middle School for science department supplies; and 3) $1,000 for scholarships for 4 local science teachers in the New Jersey Chemical Industry Council's Teachers-Science-Environment program.

The proposed increase would support the Monsanto Fund's strategic goal of science education as well as the plant's community relations program.

For additional perspective, the $3,550 increase requested for 1994 over 1993 will not bring Delaware River's funding up to the 1992 level of $36,000.

Please let me know if this fits within your program, so we can work with the plant to finalize their budget submission and allow them to make commitments to their community.

Thank you for your consideration.

Beth
