

FROM PROFESSOR E. C. DODDS.

BAYSWATER 6778.

25, PORCHESTER GATE,

W. 2.

6th November, 1948.

Dr. R. A. Kehoe,
Kettering Laboratory of Applied Physiology,
College of Medicine,
Eden Avenue,
Cincinnati, Ohio.

Dear Kehoe,

Have you had time to look at the memorandum I left with you on the urine situation? Smith and I would very much like to have your criticisms.

I should be very grateful indeed for any further information you can give me about the beryllium situation. Amor is particularly interested in this problem and we are rather in the dark about it over here.

With kind regards,

Yours sincerely,
