Dr. T. W. Nale
322 Marshall Street - Apt. 2
Kennett Square, Pennsylvania 19348

Dear Tom:

We checked on Linde stars and found that three locations are listed with the "Carbide Club" as selling stars at attractive prices.

Orgel-Shorr
31 West 47th Street
14th Floor

S & M
31 West 47th Street
15th Floor

B & J Star
Box 577
Westfield, New Jersey

I'm afraid that arrangements are not as nice as they were with Max Durafforg.

The vinyl chloride problem has taken up almost half my time since the first of the year. We have two cases at South Charleston. One died in 1968 and the other a couple of weeks ago. As of the present we are clean at Texas City.

Mrs. Denehl has severe osteoporosis which gives her considerable trouble. I still get along fairly well except that they just discovered I have thyrotoxicosis. I've had radioactive iodine and since that I have managed to get a little weight back on my bones as well as a reduction in frequency of paroxysmal tachycardia. Sometimes I wonder if it's the thyroid or the rat race in the office.

Chemicals and Plastics now has a medical director, Quentin Hull, who was at the South Charleston plant. Ruben Holland moved from Oak Ridge to South Charleston and stepped right into the vinyl chloride mess. He's done a good job.

Nice to hear from you. Enjoy your retirement and take care of yourself.

Very truly yours,

Associate Medical Director

C. U. Dernehl, M. D.
