Mr. M. J. Messel
Lake Asbestos of Quebec, Ltd.
P. O. Box 608
Black Lake, Quebec
Canada

Dear Mike:

Thank you for sending the book "Towards The Safe Use of Asbestos". This is a fine statement of the whole asbestos situation and will be of help to all who are interested in the subject. I like the very honest and straight-forward way it discusses all aspects of the problems asbestos might present. We all know there are problems present, and this will help all workers in the field see where research effort is being placed.

It seems to me a book of this type could profitably be published about every 5 years. When it is republished, I should like to suggest the exact journal, volume and page be added to the abstracts given in Appendix I. In addition any recent, comprehensive reviews or publications of Symposia which may be available at that time should be noted.

The idea behind this book is splendid, Mike, and it would not be surprising to see other trade associations copy it in their own fields.

Sincerely yours,

SHERMAN S. PINTO, M. D.
