CONSUMER PAINT INHALATION COMPLAINT
WALTER J. VAUGHN

Attached is a complaint alleging that Lucite® 50 C House Paint caused stomach problems when used outside. With all the paint we have sold, I don't recall any complaints involving this type of symptoms. Could there be anything to it, or can I reply that as far as we know, Lucite® 50 C House Paint was not the causative agent.

As far as a paint mask goes, I plan on suggesting a Bureau of Mines approved mask, if he really wants to use one.
