COPY

Gentlemen:

We have reviewed our quotation of December 9, 1960 pertaining to the subject project and would like to submit our Drawings No. D-3640-PA2 - PB3 - and PD3 which show a slight revision in the Reintjes constructions we propose to furnish for the Fantail Arch area.

We have made these revisions in order to simplify your refractory inventory and believe the use of the same refractory shapes in this area as in the Checker Chamber Arch will not only simplify an inventory problem, but will also simplify the installation of this project.

This revision will affect a change in price in Item No. 6 in our December 9 proposal which was later revised on January 23, 1961. The price for Item 6 "Flat Arch Over Fantail Area" based on furnishing superduty quality tile, will now be Three Thousand One Hundred Seventy-Five ($3,175.00) dollars f.o.b. point of shipment with freight allowed to Steubenville, Ohio.

Should you prefer to use 60% alumina quality refractory material in this area, please add the sum of One Thousand Two Hundred Thirty-Five ($1,235.00) dollars to the above price.

The changes mentioned above will not affect the prices quoted for any of the other areas.

All terms and conditions mentioned in our proposal of December 9, 1960 will apply to this revised quotation.

Very truly yours,

GEO. P. REINTJES CO., INC.
