Mr. W. E. McCormick, Director
Department of Industrial Hygiene
and Toxicology
The B. F. Goodrich Company
Akron, Ohio

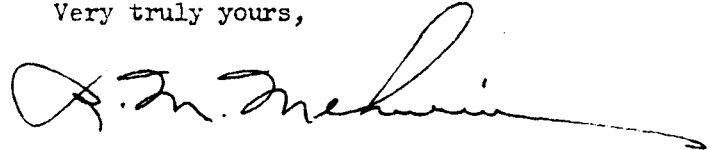

Geon

Dear Mr. McCormick:

This is in reply to your letter of April 5, and the enclosed report covering extraction studies conducted on Geon 8750 for the purpose of demonstrating its suitability for contact with curing solutions and similar liquids in federally inspected meat packing establishments.

On the basis of the data presented, plastic pipe composed of Geon 8750 of the composition previously furnished, is acceptable to this office for conveying brine and similar liquids in establishments operating under our supervision.

Very truly yours,

R. M. Mehurin, Chief
Chemical Control Section
