Subject: [EXTERNAL] RE: Secretary Wright Delegation of DOE's Participation in G7 event
Attachments: 2025 CERAWEEK Agenda + Participant list 3.6.25.pdf

Thanks much, Kim. We understand completely, and are delighted that Acting Undersecretary Winberg will be able to participate in what should still be an excellent event.

For Kevin and others on Mr. Winberg's team—I've attached the agenda that was sent on Friday. This will of course be updated to reflect the participant changes, but please note the entire dialogue is from 2-4, followed by a reception, so if U/S Winberg is able to stay beyond 2:45 and join in the roundtable dialogue following his opening remarks, it would be greatly appreciated.

Dan

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon Dan,

Secretary Wright and our team appreciate the significant amount of work that has gone into organizing this event. However, for the time he was on the schedule, with Canada pulling out, leaving him as the only G7 Minister. He has chosen to delegate DOE's participation to Acting Undersecretary [Steve Winberg](#).

Looping in Kevin Tatulyan from his staff to coordinate logistics.

- The event is Monday from 2:00-2:45pm on Monday at the Marriott Marquis.

We look forward to having Secretary Wright participate in a future U.S. Chamber event.

Please feel free to reach out to me if there are any questions.

Kind Regards,

Kimberly

Subject: [EXTERNAL] Re: Details of U.S. Chamber CERAWEEK event

One more update as we head to the weekend: the EC just notified us that Commissioner Jorgensen is likely to attend, but not until 3 pm, so may not overlap with Sec Wright.

Lots of fluidity- we'll keep you posted!

Dan

Hi Kendall,

Thanks for letting me know. I will update the Secretary's team now.

Kind Regards,

Kimberly

DOE Team,

We just learned Minister Wilkinson can no longer attend our Energy Security Forum event on Monday, as he will have to be in Ottawa for Cabinet business. Jeff Labonte, the Associate Deputy Minister at the Ministry of Energy and Natural Resources will now attend on behalf of Canada.

This is still going to be a great event with very high-level industry participation, but we wanted to inform you all of this update and respect Secretary Wright's time as he would be the only G7 representative at the minister level. We of course still welcome his participation and keynote remarks (even if he just speaks and leaves shortly after his remarks) but understand if you all need to discuss internally.

Let me know if you would prefer to chat by phone this afternoon.

p.s. the UK also updated us that they will have a ministry representative, **Marina Skrinar**, Director for International Net Zero – Trade, Energy and Analysis. The final participant list including observers is attached.

Best,
Kendall

Kendall,

Thank you for the quick response with these documents. The background of your event is especially useful. A couple flags for the Chamber's awareness:

1. There *very likely* will be an energy ministerial, but Canada has not yet confirmed that it will take place. Due to Canada's current political uncertainties, the Leaders' summit is scheduled for June 15-17 (after a presumed election). The energy ministerial, once confirmed, would take place sometime in the Fall.
2. Tommy Joyce's updated title is Acting Assistant Secretary of International Affairs. His title is very unlikely to change before your event.

Best,
Kate

Subject: [EXTERNAL] RE: Details of U.S. Chamber CERAWeek event

Thanks, Kate!

All-

Circling back with some helpful details for the March 10th CERAWeek event. Again, we are delighted Secretary Wright is able to participate. We understand Minister Wilkinson may be adjusting his travel plans to attend this event and are coordinating with the UK, France, and EC to confirm their specific participants as well.

Attached:

1. Agenda and participant list:
 1. Confirming 5-7 minutes of keynote remarks for Secretary Wright is perfect. He will likely speak between 2:15/2:25 based on timing of the speakers before him.
2. Concept Note:
 1. This 3rd annual energy security forum is intended to facilitate engagement between G7 member countries and a select group of senior industry executives on the unique and vital role of natural gas in meeting energy security, economic, and environmental objectives. As a private, high-level roundtable dialogue convened shortly before official G7 gatherings, the Chamber and IGU aim to encourage governments to adopt pragmatic, reality-based communicate language regarding the global outlook for natural gas.
 2. Additional background on the history of these communiqués is below, and for reference, also attached is the Chamber and IGU's "core messages" paper that was shared with G7 ahead of last year's ministerial meetings in Torino, Italy.

Logistics:

1. Location: Marriott Marquis Houston, TX 1777 Walker St, River Oak Conference Room A+B (5 min walk from Hilton Americas)
2. Timing: noted that Secretary Wright will only participate from 2:00-2:45pm.
3. Secretary Wright +2: Tommy Joyce and Andy Rapp are confirmed to be Secretary Wright's +2, but given limited space we are unable to accommodate additional DOE participants
4. POC:
 1. I will be your best on the ground POC the day of the event (b) (6) .
5. Other:
 1. Chatham House rules, closed to the press, invite-only event
 2. I assume your team will do an advance of the conference room space. I'm happy to share our contact at the Marriott that can coordinate a walk through with their security and safety team

Additional Background and Importance of Forum to U.S. Energy Agenda

1. Prior to 2022, annual G7 Energy and Climate communiqués rarely mentioned natural gas let alone acknowledged its foundational role in global energy security and economic progress. For example, the 2021 UK-hosted G7 communiqué stated "we recognize that

natural gas may still be needed during the clean energy transition on a time-limited basis and we will work to abate related emissions towards overwhelmingly decarbonized power systems in the 2030s.”

2. Statements such as these are not just harmless diplomatic posturing. The signal sent from the G7 has real-world impacts that reverberate into the policies and decision-making of public and private financial institutions and energy companies, deterring investment that ultimate can undermine the energy security of G7 and allied nations. In 2022, Russia’s invasion of Ukraine forced G7 a reconsideration of this dynamic, and while the German-led communique recognized the role of LNG “in response to the current crisis,” it still called for ending government support for fossil energy “except in limited circumstances...shown to be consistent with a 1.5 degree warming limit.”
3. In 2023, the first government-industry energy security forum at CERAWeek convened G7 energy ministries alongside the U.S. Chamber of Commerce, International Gas Union, and other global leaders called on host Japan to emphasize the role of natural gas in energy security. Japan worked to do just that, incorporating language noting that increased deliveries of LNG “play an important role” in response to Russia’s invasion, and that “publicly supported investment in the gas sector can be appropriate as a temporary response” to energy security challenges. In 2024, Italy maintained this language and further emphasized the importance of diversifying away from reliance on Russian energy sources.
4. With Canada hosting the 2025 G7 summit in June in Kananaskis, Alberta following an energy ministerial this spring, the CERAWeek joint energy security forum will provide an opportunity for the Trump Administration to build on the efforts of Japan and Italy, with stronger, less ambiguous language on the role of natural gas in supporting energy security, economic growth and human progress. This would not only send a clearer signal to financial institutions and other public and private stakeholders considering investment in the natural gas value chain, it will also provide momentum for incorporating key elements of President Trump’s energy agenda during the U.S.-hosted G7 Summit in 2026.
5. One aspect of this agenda heretofore left out of the G7 dialogue that could be featured at the forum is the energy access challenge faced by developing and underserved regions of the world, where more than three billion people lack access to modern, reliable energy. This is a centerpiece of the IGU’s “Gas is Essential to Human Progress and Global Growth” campaign.

Don’t hesitate to reach out with any further questions.

Best,
Kendall

Hi Dan and Kendall,

I hope this finds you well. I'm reaching out regarding the Chamber-organized G7 and industry event at CERAWEEK. We're delighted Secretary Wright is able to participate.

Do you have an agenda, concept note, or other event information you can share? We want to provide the Secretary and his team with as much useful information as possible before the event.

My understanding, passed along by my colleagues who you spoke to Monday, that Secretary Wright will provide 5-7 minutes of keynote remarks toward top of the event and his entire participation window will be 2-2:45pm.

Many thanks,
Hayley
