Kenneth M. Lynch, M.D., Dean
Medical College of the State
of South Carolina
Charleston 16, S. C.

Dear Dr. Lynch:

You will be interested to learn that we plan to hold a Saranac Symposium on industrial pulmonary diseases during the five days from September 29th to October 3d.

The question has arisen whether a paper by you, based on the asbestosis report, could be suitably included in the Symposium. The asbestos interests quite rightly feel that this should only be done if your work has been completed early enough to permit adequate consideration of your report well in advance of the proposed delivery, and I would greatly appreciate your giving us your thoughts on this.

Please understand that this is a wholly tentative proposal, since the agenda of the Symposium have by no means been worked out.

Sincerely yours,

Manfred Bowditch
Field Director

MB:LB

P.S. I was much interested to learn recently from Tom Shipman that he and Frances are good friends of yours.

M.B.
