

LEAD INDUSTRIES ASSOCIATION

282 MADISON AVENUE

NEW YORK 17, N. Y.

October 19, 1961

SUBJECT: INDUSTRIAL BUILDING
EXPOSITION

To: Members of the Lead Industries Association:

Our exhibit at the 2nd Annual Industrial Building Exposition held at the New York Coliseum on September 25-28, 1961, attracted considerable attention, particularly to lead's sound and vibration attenuating properties.

A list of those requesting further information on specific products is attached. You will note that we have indicated the subject or subjects in which they expressed interest and desired more information. These have been answered by our staff and the names are being placed on our mailing list to receive our quarterly publication LEAD.

A breakdown of these inquiries by subject follows:

<u>SUBJECT</u>	<u>NUMBER OF INQUIRIES</u>
AntiVibration Pads	74
Sound Barriers	68
Light Weight Glazed Brick	25
Loaded Porcelain Enamels	24
Nuclear and X-Ray Shielding	10
Roofing and/or Flashing	9
Miscellaneous Architectural Materials	5
All Other	36

Though the Show's total attendance was disappointing, due perhaps to the fact that this was only the second year of operation, what it lacked in quantity was certainly made up by quality. About 15 per cent of our own inquiries, for example, are from either presidents or vice presidents of their respective organizations.

A photograph of our exhibit is also attached.

Sincerely yours,

David M. Borcina
