PLEASE REFER TO OUR JULY 29, 1971 TELETYPE CONCERNING A CONTAMINATION
OF PASTEURIZED FISHMEAL WITH POLYCHLORINATED BIPHENYLS FROM A LEAKING
HEAT EXCHANGE FLUID. IT ANNOUNCED FDA'S GUIDELINES FOR PROVIDING
CONSUMER AND ANIMAL PROTECTION FROM PCB'S IN POULTRY AND IN ANIMAL FEED

OR IN FEED INGREDIENTS.

IN ADDITION, WE ARE ADHERING TO A GUIDELINE OF 0.5 PPM FOR PCB'S IN
EGGS AND HAVE SEIZED SOME LOTS OF EGGS WHERE THIS LEVEL HAS EXCEEDED.
AGAIN, ALL OF THESE GUIDELINES ARE PREDICATED ON OUR PRESENT

INFORMATION REGARDING PCB'S, AND ARE SUBJECT TO CHANGE AS ADDITIONAL
TOXICOLOGICAL STUDIES ARE COMPLETED.

O. H. HENAGAN, ASSISTANT TO THE DIRECTOR
DIV OF FEDERAL-STATE RELATIONS, OFFICE OF EXECUTIVE DIRECTOR OF
REGIONAL OPERATIONS
