Mr. D. R. Keck
Vice President-Manufacturing
Tenneco Chemicals, Inc.
Petrochemicals Division
P. O. Box 849
Pasadena, Texas 77501

Dear Mr. Keck:

It has been recommended by the Manufacturing Department of Tenneco Plastics that we immediately adopt a policy to discontinue weighing of all empty VCM tank cars.

It has been further recommended that we set an average return weight of 2,200 lbs. for each of the large cars i. e. the 35,000 gallon and 38,000 gallon cars. For the few remaining 22,000 gallon cars (17,000 series), we will accept an 800 lb. credit for an average return weight.

The period set for these averages would be from now through September. We will then check weigh some cars to establish another level for the colder season and reset the average if necessary.

Upon your concurrence with the above, I will immediately stop weighing cars. Please advise.

Very truly yours,

TENNECO PLASTICS DIVISION
