SUBJ: TSCA SECTION 4 TESTING REQUIREMENT FOR METHYL CHLORIDE

VISTA

The MCIA will proceed to coordinate the required hydrolysis testing for Methyl Chloride. A copy of our commitment letter is attached. Latham and Watkins will make the notice of testing to EPA this week.

Total cost for the testing will probably be approximately \$10,000, to be split equally by MCIA members. The testing agreement among the companies and the contract from the testing laboratories are being developed now.
