In a meeting at Tigard today it was determined that we wish to have the asbestos warning printed on our 5-gallon and 1-gallon pails and our four gallon ready-mix cartons rather than continue with the self-sticking labels.

We would like to have someone in your department prepare six (6) black and white copies of the same warning as used on our joint compound bags except for the addition of a line reading "Use approved respirator when sanding". A photocopy of this label is attached with the extra printing written in in red.

As soon as these layouts are completed, I will send one each to our 5-gallon pail suppliers, our 1-gallon pail suppliers and our carton supplier.
