

Georgia Gulf Chemicals & Vinyls, LLC Aberdeen Plant Emergency Response Plan
--

Subject: **Emergency Notifications and Communications**

Code: ERP IV Revision: 3 Effective: January 1, 2000

Approved By:  Safety & Health Manager

Approved By:  Plant Manager

IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS

A. In Plant Notifications - Emergency Phone

When emergency conditions are discovered in the plant, any person in the facility can report these conditions to the Vinyl Control Room by dialing **2200** from any plant telephone extension. When extension **2200** rings in the Vinyl Control Room, the call is answered by the assigned operator, and all available information is recorded. With the reported information, response decisions are made, which may include plant-wide notification. In addition to dialing 2200, the Emergency Phone number, the vinyl control room can also be contacted by radio on channel 1 or channel 2.

B. In Plant Notifications - Plant Alarm

To notify plant personnel of emergency situations, the Georgia Gulf, Aberdeen Plant utilizes a plant-wide notification system. This system includes speakers located throughout the facility to deliver tone notifications as well as voice messages.

IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS

A. In Plant Notifications - Emergency Phone

When emergency conditions are discovered in the plant, any person in the facility can report these conditions to the Vinyl Control Room by dialing **2200** from any plant telephone extension. When extension **2200** rings in the Vinyl Control Room, the call is answered by the assigned operator, and all available information is recorded. With the reported information, response decisions are made, which may include plant-wide notification. In addition to dialing 2200, the Emergency Phone number, the vinyl control room can also be contacted by radio on channel 1 or channel 2.

B. In Plant Notifications - Plant Alarm

To notify plant personnel of emergency situations, the Georgia Gulf, Aberdeen Plant utilizes a plant-wide notification system. This system includes speakers located throughout the facility to deliver tone notifications as well as voice messages.

IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS - Continued**B. In Plant Notifications - Plant Alarm -Continued**

When an emergency call is received by the vinyl control room, all information is taken and appropriate actions are initiated. The initial actions when a call is received shall be as follows:

Fire	Sound Plant Alarm and notify Supervision
Vapor Release	Sound Plant Alarm and notify Supervision

Tornado	Sound Plant Alarm and notify Supervision
----------------	---

Injury to 2 or more persons...Sound Plant Alarm, contact the lab, notify supervision, call for ambulance as required.

Injury to 1 person...Contact lab, notify supervision, standby to call ambulance if required.

When notified of a plant emergency through the plant alarm system, all employees not directly involved in the response shall secure the work area and report to their headcount area as described in the headcount procedure of this plan (Section IX).

Code: ERP IV

Revision: 3

Effective: 01/01/2000

Document is uncontrolled unless "Controlled Document" appears on the right margin of the page.

IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS -
Continued**C. Emergency Callout**

When a plant emergency occurs, rapid notification of the plant's Emergency Response Team and Incident Command Staff is essential to timely response, reporting, and better overall emergency management. To assist in the callout of the Command Staff, a pager callout system has been implemented.

In the event an emergency occurs, to activate all pagers, plant personnel can dial **256-6917**, at the recording dial **2200#**. This paging will notify all Command Staff and ERT members to respond to the plant immediately. In addition to the "all call" number, each individual pager has an assigned number. By using this number, each Command Staff member can be paged individually. Refer to Attachment A, the Emergency Call List for names, phone numbers, and pager numbers for emergency call out personnel.

D. Emergency Contacts - External

In the event of a plant emergency, there may be the need to contact outside response agencies for reporting or to request assistance. Each event shall be evaluated to determine who and when to call for outside assistance or for reporting purposes. To assist in locating appropriate contacts for such purposes, refer to Attachment B, Emergency Phone Numbers.

**IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS -
Continued****E. In-Plant Communication and Phone Use**

This section covers radio usage, phone calls outgoing and incoming, and rules of operation during a declared emergency.

Radios:

During a bomb threat, no one will transmit on a radio until an **"ALL CLEAR"** has been given by the Incident Commander.

All radios will be switched to emergency channels upon notification of an emergency.

- Channel 3 will be used to communicate at emergency scene.
- Channel 4 will be used to communicate from emergency scene to Command Center.
- All other radio transmissions on these channels are not authorized after a declared emergency and must stop until an **"ALL CLEAR"** has been given by the Plant Manager or designee.

Subject: Emergency Notifications and Communications**Code: ERP IV****Revision: 3****Effective: 01/01/2000**

Document is uncontrolled unless "Controlled Document" appears on the right margin of the page.

**IV. EMERGENCY NOTIFICATIONS AND COMMUNICATIONS -
Continued****E. In Plant Communication and Phone Use - Continued****Telephones:**

During a declared emergency, all non-emergency related telephone usage will stop.

All incoming calls will be answered by the Security Guard.

- The caller will be informed that the called individual is not available and for the caller to call back in two hours.

- Should caller be news media:

- * Take:
 - (1) Name
 - (2) Telephone Number
 - (3) Affiliation, i.e., channel, newspaper, etc.

Pass information on to Command Post.

- Should caller be Corporate:

- * Transfer to Command Post.

- Headcount call-ins will be directed to the Guard at 2249.
