August 30, 1974

Mr. A. W. Carpenter, Manager  
Personnel Services  
Glass Division

Subject: Fibrous Talc Exposures

We are checking on the status of our May 30, 1974 report to you on industrial hygiene aspects of fibrous talc exposures used in your Dearborn Glass Plant. Would you please indicate the current status of completion of each of our recommendations which are within your jurisdiction and return?

If you would like to discuss, please call me at extension 22630.

Sheldon H. Rabinovitz
