

BELLE CITY MALLEABLE IRON COMPANY

RACINE STEEL CASTINGS COMPANY

RACINE, WISCONSIN

January 8, 1940

Dr. Robert A. Kehoe
University of Cincinnati
College of Medicine
General Hospital
Cincinnati, Ohio

Dear Dr. Kehoe:

Mr. [REDACTED] advises that the containers with specimens will be returned to you tomorrow and that he has followed your instructions carefully.

We are listing below the type of charge used when this man was exposed and the laboratory advises that there is 2.5 pounds of lead to every ton ofterne plate. They also advise that their experience showed there was a maximum of .05 lead retained in a heat.

<u>Heat Number</u>	<u>Pig</u>	<u>Terne Plate</u>	<u>Spune</u>	<u>Punching</u>
5858	175	5100	2400	-
5856	100	4400	2300	800
5862	225	5100	2400	-
5871	325	5200	2300	-
5892	150	5100	2400	-

We trust that this test will give some indication and that we may soon have a report from you.

Yours very truly,

BELLE CITY MALLEABLE IRON CO.

J. Killo
