

Interoffice Communication

To Distribution

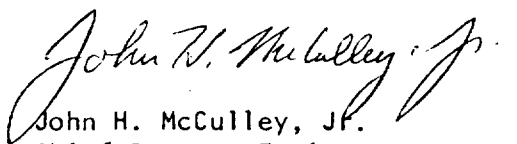

From J. H. McCulley, Jr.

Date May 7, 1982

Subject EPA VCM Standard Information Exchange Meeting

A PVC plant VCM standard information exchange meeting will be held in Aberdeen on Friday, May 14. The meeting agenda is attached.

You will note that the agenda seems impossibly long. Hopefully a number of the items listed can be covered quickly. It is important to cover all the items under the relief discharge prevention heading. If necessary, some of the items may best be resolved in another meeting.

John H. McCulley, Jr.
Chief Process Engineer
Chemicals Division
Process Engineering Department
