

WHITE- LEAD *on the farm*

PURE white-lead paint—good, old-fashioned “lead and oil”—serves many uses on the farm. It is used in weatherproofing and beautifying the farm home and all other buildings, in decorating inside walls, in protecting vehicles, fences and farm machinery, in painting all surfaces—wood, plaster, metal, concrete, brick, stone.

The wide use on the farm of pure white-lead paint—the kind made with Dutch Boy white-lead—is due to the fact that this paint wears long, does not crack or scale, saves money in the end.

You can now get Dutch Boy white-lead in a new form—as a soft paste which can be made ready for the brush in a few minutes. Saves time and labor in mixing paint.

Write our nearest office for the helpful “Hand-book on Painting,” 125 pages. Tells how to paint farm property and equipment.
