Attention: Mr. F. T. Wood, Jr.
Materials & Process Engineer

Gentlemen:

We wish to thank you for your letter of September 22, outlining your results comparing standard EPON Adhesive VIII with a modified version which we had contemplated as a means of improving certain properties of the resin.

We were very much interested to learn that you obtained such excellent results with both the standard and the modified form, and, in view of the fact that you do not observe any appreciable difference, it is not likely that we will continue our work with the modified form. This, of course, will be determined to some extent by the experience of other people also evaluating this formulation. We will continue to supply the standard formulation to you.

We sincerely appreciate your cooperation in evaluating and reporting your results with this adhesive, and will look forward to continued pleasant relationships with you and your associates. Thank you very much.

Very truly yours,
