

All alone in the house?

Caught in the rain last night?

Trousers look like a gunny-sack this morning?

I don't care.

An ironing board, a damp cloth and a turn of the electric switch and in 5 minutes my trousers look like new.

And when my wife comes back I am going to get her an Electric Percolator, an Electric Samovar, an Electric Range, an Electric Toaster and an Electric Hot Water Cup.

I have been told all about these things for years. Now I have actually used an Electric Flatiron and I know all the electric comforts that I have been missing.
