

Occidental Chemical Corporation

December 7, 1982

Mr. Otto Wong, Sc.D.
Environmental Health Associates, Inc.
2150 Shattuck Ave., Suite 414
Berkeley, California 94704

Dear Mr. Wong:

The Epidemiological Study update for our Company, formerly the Firestone Plastics Company, has finally been completed and shipped to your attention.

As you review the data, you will note that we have grouped the forms into the following categories for our Pottstown and Perryville Plants:

1. Pottstown

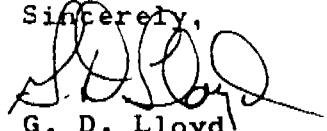

- A. No records available to either confirm or complete the information sheets.
- B. No death certificates available
- C. Completed - active employees
- D. Completed - inactive employees

2. Perryville

- A. No records available to either confirm or complete the information sheets
- B. Completed - active employees
- C. Completed - inactive employees

Following Occidental's purchase of the Firestone Plastics Company, many records were sent to the Firestone Tire & Rubber Company, since the records belonged to them. As a result, some of your information sheets could not be completed. If these data are vital, you should contact the Medical Director of Firestone at their Corporate Offices in Akron.

Sincerely,

G. D. Lloyd
Manager, Safety
