CERTIFICATE OF SERVICE

I hereby certify that a true and correct copy of the above and
foregoing document has been forwarded to Plaintiffs' counsel of
record, Mr. Russell W. Budd, Baron & Budd, by hand delivery on the
8 day of SEPT., 1993.

David W. Crowe
DAVID W. CROWE

PREFATORY STATEMENT

United States Gypsum Company (hereinafter "U.S. Gypsum") has, to the best of its abilities, gathered non-privileged documents into a document repository for inspection by plaintiffs' counsel in response to requests for production served in asbestos litigation. These documents provide information that supplements and expands upon that provided in these answers to Interrogatories and Requests for Production. Accordingly, by way of further response to these Interrogatories and Requests for Production, U.S. Gypsum hereby offers to make available these documents at a mutually convenient time at its offices at 125 S. Franklin Street, Chicago, Illinois.

In giving its responses to Interrogatories and Requests for Production as to asbestos-containing products, U.S. Gypsum refers to products containing commercial asbestos as part of their formulation and to the type of commercial asbestos used as part of the formulation.

OBJECTIONS

U.S. Gypsum objects to the manner in which plaintiff purports to include in its definition of U.S. Gypsum "any of its merged, consolidated, or acquired predecessors, division, subsidiaries, foreign subsidiaries, foreign subsidiaries of predecessors, and/or affiliates known to have mined manufactured, sold, marketed, utilized or distributed asbestos or asbestos-containing products into ships or other water-going vessels. This definition includes present and former officers, directors, agents, employees, and all other persons acting or purporting to act on behalf of U.S. Gypsum Company or its predecessors, subsidiaries, and/or affiliates known to have mined, manufactured, sold, marketed or distributed asbestos or asbestos-containing products. 'Predecessors' further means any business firm, whether or not incorporated, which had all or some of its assets purchased by you or came to be acquired by you whether by merger, consolidation, or otherwise known to have mined, manufactured, sold, marketed, utilized, or distributed asbestos or asbestos-containing products. 'Subsidiaries' further means any business firm whether or not incorporated, which is or was in any way owned or controlled, in whole or in part by defendant or its predecessors and which is known to have mined, manufactured, sold, marketed, utilized or distributed asbestos or asbestos-containing products." In that U.S. Gypsum Company is the named defendant, this definition is overly broad and would require U.S. Gypsum to engage in unduly burdensome research, divulge privileged information and produce privilege documents. This defendant, United States Gypsum Company, responds to these Interrogatories and Requests for Production on behalf of itself.

U.S. Gypsum further objects to these Interrogatories and Requests for Production to the extent they ask for "identification" of voluminous documents on the ground that they are overly broad, unduly burdensome and not reasonably calculated to lead to the discovery of admissible evidence. As set forth infra, U.S. Gypsum will produce documents which are the proper subjects of an appropriate document request.

Finally, to this defendant's best current knowledge, information and belief, this defendant believes that its products were never used in the shipbuilding trade. This defendant never manufactured any asbestos insulation material suited for shipbuilding. Most of this defendant's asbestos-containing products were gypsum-based and therefore were not suitable for use around water, moisture, ships, etc.

ANSWERS TO INTERROGATORIES

INTERROGATORY NO. 1:

Identify by name and location each plant ever owned, operated, or at a later time bought or at a later time bought or under control of U.S. Gypsum Company, in which asbestos-containing products were manufactured, assembled, or prepared for sale or marketing, specifying which plants produced each item, the dated each plant is or was in operation, and the time span during which each asbestos-containing product was manufactured, assembled, or prepared for sale or marketing.

Answer:

See attached Schedule D.

INTERROGATORY NO. 2:

Does U.S. Gypsum Company have in its possession or custody any x-rays, taken before 1970, of individuals who worked in any plant in which asbestos-containing products were manufactured, assembled, or prepared for sale or marketing? If so, state:

- a. The name of each plant;
- b. The location of each plant;
- c. The time periods in which asbestos-containing products were manufactured, assembled, or prepared for sale at each plant;
- d. The date each plant closed;
- e. Where such x-rays are kept; and
- f. The occupations of the individuals who had x-rays taken.

Answer:

Objection. This Interrogatory is overbroad, irrelevant, immaterial, and is not reasonably calculated to lead to the discovery of admissible evidence.

INTERROGATORY NO. 3:

Has U.S. Gypsum Company turned over any papers, documents, writings concerning asbestos, the health effects of asbestos, or asbestos-related disease to any law firm? If so, state:

- a. A description of each paper, document, or writing; and
- b. The name and address of the law firm.

Answer:

Objection. This Interrogatory is overbroad, irrelevant, immaterial, and is not reasonably calculated to lead to the discovery of admissible evidence.

INTERROGATORY NO. 4:

Has U. S. Gypsum Company, or attorneys representing U. S. Gypsum Company, destroyed any documents which refer or relate to asbestos, the health effects of asbestos, asbestos-containing products, or dust studies that measured asbestos dust? If so, state:

- a. A description of each document;
- b. The author of each document;
- c. A summary of the subject matter of each document; and
- d. The reason for the destruction of each document.

Answer:

This defendant has a record retention policy in place which will be made available. To this defendant's best knowledge, information and belief, no documents referring or relating to asbestos, etc. have been destroyed since this defendant became involved in the asbestos litigation.

RESPONSES TO REQUEST FOR PRODUCTION

REQUEST FOR PRODUCTION NO. 1.:

Produce copies of all writings or documents relating to asbestos, the health effects of asbestos, or asbestos-containing products that U.S. Gypsum Company has provided to, and which are currently kept by, any law firm, other than writings or documents that are subject to the work product privilege.

RESPONSE:

Objection. This Request is overbroad, irrelevant, immaterial, and is not reasonably calculated to lead to the discovery of admissible evidence. Without waiving this objection, non-privileged, responsive documents, to the extent they exist, will be made available to plaintiff at a mutually convenient time through U.S. Gypsum Company's offices at 125 South Franklin Street, Chicago, IL.

REQUEST FOR PRODUCTION NO. 2.:

Produce all reports, documents or writings of dust studies performed in U.S. Gypsum Company plants or facilities in which concentrations of asbestos dust were measured.

RESPONSE:

Non-privileged, responsive documents, to the extent they exist, will be made available to plaintiff at a mutually convenient time through U.S. Gypsum Company's offices at 125 South Franklin Street, Chicago, IL.

REQUEST FOR PRODUCTION NO. 3.:

Produce copies of all writings, documentation that show or refer to the fact that Howard Bowman testified at any OSHA hearing concerning asbestos or asbestos-containing products.

RESPONSE:

To this defendant's best current knowledge, information, and belief, none.

REQUEST FOR PRODUCTION NO. 4.:

Produce all studies performed for U.S. Gypsum Company by Metropolitan Life Insurance Company, The Travelers Companies, Commercial Union Insurance Companies, Liberty Mutual Insurance Group, and/or any subsidiaries, divisions, affiliates, or predecessors-in-interest of such companies relating to the health effects of exposure to asbestos dust.

RESPONSE:

Non-privileged, responsive documents, to the extent they exist, will be made available to plaintiff at a mutually convenient time through U.S. Gypsum Company's offices at 125 South Franklin Street, Chicago, IL.

VERIFICATION

I, F. M. Poremski, declare:

I am the Director, Financial & Accounting Services of United States Gypsum Company, one of the above named defendants, and am authorized to make this verification for and on behalf of said company;

I have read the foregoing Answers, Objections, and other Responses to Plaintiff's Interrogatories and am informed and believe that the same is true and on that ground allege that the matters therein stated are true.

I declare, under penalty of perjury, that the foregoing is true and correct, and that this declaration was executed on September 7, 1993 in Chicago, Illinois.

F. M. Poremski

ASBESTOS-CONTAINING PRODUCTS MANUFACTURED BY U.S. GYPSUM

The dates listed here are taken from product operating bulletins which governed the manufacturing process. The cancellation of these operating bulletins usually coincided with cessation of production, but occasionally bulletins would remain uncanceled after the manufacture of a product had been discontinued. Consequently, the years shown for cancellation of authorization are believed to be the last possible year of manufacture, although manufacture may have in fact ended earlier. Production dates established through documentation other than product operating bulletins have been footnoted. Temporary and trial production runs are included (along with regular production). These have been footnoted for Firecode and can be determined for other products from a review of operating bulletins. With texture products, such runs were occasionally given slight name variations.

		1967	1978	Vancouver, CAN ³
	INSULATING CEMENT		1936	1938

February 16, 1993

NOTE:

Not all products were necessarily made at all plants at all times listed, even though they were authorized for production.

- 1 At some period of time between 1926 and 1930, Sabinite is believed to have been manufactured at U.S. Gypsum's plant at Arden, Nevada. However, no bulletins for that plant have been located, it having been closed in 1930.
- 2 Sabinite may have been produced until this date, but sales diminished substantially by the mid-1950's.
- 3 Not sold in the United States.
- 4 Two-component Hi-Lite plaster was authorized for production in June 1953 and discontinued in August 1954. Approximately 4 tons of a temporary variant was produced during 1953, and packaged as "Lime-Keene's Acoustical Plaster."
- 5 Marketed as Red Top Acoustical Plaster with the word 'Spray' stenciled on the bag from 1954 to 1955; marketed as Red Top Spray On Acoustical Plaster in 1955; marketed as Red Top Audicote Acoustical Plaster from 1955 to 1968.
- 6 A trial job of 3 tons only.
- 7 Contained less than 1.0% asbestos (not asbestos-containing products under applicable law).
- 8 Two month production run only.
- 9 Temporary production of Firecode only.
- 10 Trial jobs were produced in 1959 for tests by Underwriters' Laboratories; regular production commenced in 1960.
- 11 As of December of 1969 Firecode V had been dropped from U.S. Gypsum's product line and sales of this product had not been actively solicited by the company for some time. U.S. Gypsum believes that a limited quantity of Firecode V was produced in early 1970 at the East Chicago plant for the completion of a single job already in progress.

- 12 U.S. Gypsum manufactured SprayDon pursuant to the specifications of Sprayon Research Corporation. While Types A and G remained on operating bulletins until 1973, production of G was discontinued in 1970, and A was discontinued on January 1, 1972. Type I, though authorized, was never produced.
- 13 From production records.
- 14 X-Pac 19 was produced for A.P. Green and packaged and sold by that company under the name INSBLOK. Information contained in plant records suggests that production may have commenced in 1969.
- 15 Information contained in plant records suggests that production may have commenced in 1965.
- 16 Temporary production only.
- 17 Trial job authorized for temporary production only on and off from 1959 to 1961.
- 18 Marketed from 1970 to 1977 as Sheetrock Texture Finish Paint in Canada.
- 19 Although authorization to manufacture these products was not cancelled until 1940, the last sales took place in 1938.
- 20 Actual Canadian production ceased in 1978.
- 21 This product line was manufactured by a company that became a U.S. Gypsum subsidiary in 1971, and records of the production history are incomplete.
- 22 Records regarding the production history of this product line are incomplete.
- 23 Though authorized for production until 1978, actual production ceased in 1977.

Most of the products identified in this exhibit have a shelf life of approximately six months, with some variation due to humidity and storage conditions. It is the policy of the defendant to provide this information to all customers. Therefore, date of last production approximates date of last sale, though U.S. Gypsum is not certain whether shelf life guidelines were adhered to by its customers. Reasonable investigation is continuing.

Further information concerning products which are established to be at issue is contained in documents which will be made available for inspection at the offices of United States Gypsum, 125 South Franklin Street, Chicago, IL 60606-4678.
