UNIROYAL, Inc.

OXFORD
(Location)

August 12, 1976

TO: W. D. Crawford, Plant Manager
M. McCord, Industrial Relations Manager

Please see the attached letter to Grace Hipp, R.N. for my recommendations following my visit to Hogansville on August 4th and 5th.

In addition may I suggest that:

1.) Further conversations be held with Dr. Wells in regard to:

a.) Looking into the feasibility of microfilming all chest x-rays of other than the current, on-going asbeston examination group.

b.) Checking whether a fireproof x-ray storage system is available for Dr. Wells' office for the x-rays of all current and on-going asbeston examinees.

2.) Strong consideration be given to reinstituting the form used in the 1960's called "Hogansville Statistics - Asbestosis" (copy of 7/67 attached). This format would allow you to follow cases to date and their status as well as a means of advising Oxford.

J. Dexter Forbes, M.D.
Corporate Medical Director
