October 1, 1986

TO: The Vinyl Institute Health, Safety & Environment Committee*

Enclosed are the following items that will serve as background material for our meeting of October 8th:

1. 51 FR 34904-15: Final Rule - Vinyl Chloride NESHAPS. For your information, Peter de la Cruz has been requested to prepare a brief analysis of the final rule and its effect that will serve as background for our discussion.
2. The comments filed on September 26th on EPA's RCRA Toxicity Proposal. These comments were filed by SPI on behalf of the Vinyl Institute and the Phenolic Division.
3. The contractor's interim report on the multi-laboratory "Collaborative Study of the Toxicity Characteristic Leaching Procedure (TCLP)". As you know, the availability of this Interim Report was published in the September 19, 1986 Federal Register.

Please note the distribution list that appears at the end of this memo. The mailing list for this committee has grown significantly over the last few months. If there are others in your company that you believe should receive some or all of the enclosed material, please make it available to them. Many thanks for your cooperation.

Meredith N. Scheck
Assistant Director

MNS/pmb
