FOR information on the use and sale of stokers, coal and coal heating equipment, you can turn to COAL-HEAT with complete confidence.

Here is a magazine that appeals to every man concerned with the market, use and sale of solid fuel and modern heating equipment. Having long since recognized the importance of properly designed efficiently operated, properly maintained equipment to the successful use of coal,

and therefore to the welfare of the coal industry, COAL-HEAT constantly emphasizes the significance of the "equipment factor" in heating merchandising.

It is only natural that COAL-HEAT was the first trade magazine to recognize and promote the small stoker; to introduce many new developments in coal-burning equipment to further fuel conservation; to support the use of dustless treatment; and to urge the sale of equipment by coal men.

COAL-HEAT has at its disposal an almost unlimited number of sources of authentic information on the topics it covers; its articles are written by the best informed men in the coal, stoker and heating industries. It enjoys quite a following, not only among the most progressive merchants in these industries, but among the industry's leading combustion and heating engineers. For years it has championed the importance of the fuel engineer to the coal and stoker industries, and each year prints many articles for and

Outstanding
Coverage
of the
Coal and Stoker
Industries

by fuel engineers.

COAL-HEAT's fundamental editorial policy is "to further the more satisfactory use and sale of coal and modern coal-burning equipment." It actively supports the application of scientific and engineering knowledge to the use of coal and coal-burning equipment. It covers both the merchandising and utilization of the coal, stokers and modern heating equipment.

With over a million stokers in use today, the

importance of COAL-HEAT's field is clearly evident. It has been and is COAL-HEAT's job to supply coal and stoker men with the information they need to insure satisfaction for stoker users. The same is true with hand-fired heating plants and all kinds of household and commercial coal heating equipment.

In addition to providing its readers with a basic and diversified editorial program, COAL-HEAT also publishes a number of books and booklets, manuals and reprints covering a wide range of subjects of interest to coal, stoker and heating men. Its series of heating guides for the consumer have proved particularly popular. These are available at small cost.

Subscription rates—\$2.00 a year; \$3.00 for two years. Rates apply for both United States and Canada. Foreign rates—\$2.00 a year; \$4.00 for three years.

Advertising rates and other information will be furnished upon request.

Domestic Engineering Publications

AN OUTSTANDING RECORD OF

Editorial

Achievement

... and Now 1945 - - - - -

5 TIMES A WINNER !

For another of its many outstanding and widely recognized editorial accomplishments, DOMESTIC ENGINEERING has once again received high honors in competition with over 400 of the nation's leading business papers.

The consistent editorial superiority of DOMESTIC ENGINEERING, demonstrated time and again during its 56 years of publishing experience, has now been accorded this special recognition for the fifth time.

Once more DOMESTIC ENGINEERING offers these accumulated high honors as a testimony to the alertness of its organization to the vital requirements of its industry, and of the nation as a whole.
