Request: The American Gas Association (AGA) and Natural Gas Vehicles of America (NGVA) would like to arrange a follow-up meeting with you to discuss our ideas for regulatory reform, as described in our attached comments, filed May 15, 2017 in Docket EPA-HQ-OA-2017. AGA's comments address several programs, but at this meeting, we will want to focus on revisions we have suggested to improve: (1) the Subpart W reporting rule and (2) the PCB rules.

 Briefing for additional rule amendments to the Formaldehyde  
 Emission Standards for Composite Wood Products final rule.

EPA received letters from stakeholders noting several technical issues with the final TSCA Title VI formaldehyde final rule that they request the Agency address through rulemaking or interpretive guidance. The purpose of this meeting is to brief the OCSP DAA on these issues and obtain a decision on whether to address the issues through proposed rulemaking and new interpretive guidance.

 **Time** 2:00 PM – 3:30 PM  
**Subject** Interagency call on lead (Call-in: 202-991-1006) Conference ID: 9693678)  
**Location** DCRoomEast3371C/DC-EPA-EAST-OCSP-IO-OPMO  
**Show Time As** Busy  
Interagency review participants: EOP offices, DOJ, HUD, and SBA/Advocacy

I understand that some of you will need to participate remotely. We're asking that folks who are physically at headquarters participate in person so we can caucus on mute if necessary. OMB has given interagency reviewers until 1 to provide any written comments. Mindful of the TSCA 411 docketing requirements, OMB anticipates that most comments will be verbal. I was asked to buffer the meeting duration to accommodate 1 participant who may need to leave the call early and come back on after another appointment. We may not need the extra 30 minutes, but we'll have it available to us.

A copy of the document as submitted to OMB this morning via ROCIS upload is attached for your convenience.

OCSP Briefing on the Hazard Standard estimates.

Note that based on discussions with HUD staff and their general counsel, it appears that changing the hazard standards will automatically change the clearance levels in housing subject to the

HUD Lead-Safe Housing Rule. (HUD never anticipated that the hazard standards would be different from the clearance levels, so the clearance requirements in the LSHR are cross-referenced to EPA's hazard standards.) The hazard standard estimates available will not include the costs and benefits of the HUD clearance activities that will be triggered by a change in the hazard standards. The estimates of the effect of HUD clearance activities will not be available until the next phase (i.e., clearance impacts).

 Hi Nancy and Charlotte,

Tala Henry is coming to our PFAS pre-meet next week. But we don't have your OCSPP contact yet for the lead SAB briefing. We have a pre-meet today at 3:30. If someone from OCSPP could join us that would be great. Of course we will fill you in later if you can get the right person to the phone call today.

Best regards,

Tom

Hello,

Tom Brennan asked me to get us together to discuss/plan for a briefing to the Science Advisory Board on the EPA effort on Lead. I would like to start planning a robust panel discussion to present the Board with the EPA's leadership and Interagency work on the President's Task Force on Environmental Health Risks and Safety Risks to Children.

Please let me know if we need a conference line and if there are other person(s) we should invite?

Background

The SAB meeting is June 1.

Meeting materials must be publicly available and should be posted on the SAB website two weeks ahead of the meeting.

As a briefing there is not a specific charge to the Board. As a result of the discussion agency staff and SAB members may identify areas

where the Boards advice may benefit the agency.

A draft agenda for the briefings is attached

Goals for our meeting:

Identify topic areas and the offices to participate on the briefing panel

Identify additional staff that should be in the room top participate in the discussion

at the meeting

Identify materials approval reviewers

Set schedule to meet May 16 posting

Straw Agenda is attached

Directions and Visitor Entry Procedures (PLEASE READ PRIOR TO ARRIVAL):

Please send Hema Subramanian (Subramanian.hema@epa.gov <mailto:Subramanian.hema@epa.gov> ) a list of names of non-federal visitors two days prior to the meeting, and arrive 15 minutes prior to your appointment to allow time for security screening and escort to the meeting room.

EPA address is 1200 Pennsylvania Avenue, NW.

Metro stop: Federal Triangle

Although our street address is 1200 Pennsylvania Avenue, the main entrances for visitors are not along Pennsylvania Avenue. Enter the William Jefferson Clinton South building via doors to the left of the Federal Triangle Metro exit escalators (when exiting the Metro and facing Woodrow Wilson Plaza). For more details and a map:

<https://www.epa.gov/aboutepa/visiting-epa-headquarters>

If you are coming by taxi/vehicle, you want to be dropped off on 12th Street NW, midway between Pennsylvania and Constitution Avenue. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left side near the escalators going down to the metro. This is the South Lobby entrance to the William Jefferson Clinton building.

Non-federal visitors will need to go through metal detectors and provide the security desk:

- your REAL ID Act-compliant identification
- EPA contact information (Hema Subramanian, 202-564-5041)
- destination room (Alm Room)

Security will call us to sign you in and escort you to the room. For details on security and ID requirements, see:

ABS has developed an semi-permanent antimicrobial surface coating. Clinical studies have shown that in hospital settings the use of their coating significantly cuts the rate of Hospital Acquired Infections.

ABS is in the process of registering a new active ingredient and having their claims validated by the Anti-Microbial division at EPA. We have had multiple meetings with staff in the Anti-Microbial division that have been positive, but ultimately the process to bring this life saving technology to market is still extremely slow.

**Show Time As** Busy  
 Members of the Toxic Substances Control Act (TSCA) New Chemicals Coalition (NCC) would like to schedule a meeting with you and other U.S. Environmental Protection Agency (EPA) staff. The purpose of the meeting is to discuss the issues staff is encountering as part of new chemical reviews under TSCA Section 5. We believe there may be approaches in which we could work together to solve the many challenges that the Office of Pollution Prevention and Toxics (OPPT) faces in implementing new TSCA while diminishing the significant problems that continue to occur.

In particular, we are specifically concerned with the ongoing commercial impacts resulting from assumptions about workplace practices that are overseen by the U.S. Occupational Safety and Health Administration (OSHA). We believe a transparent and factual basis for EPA's assumptions for new chemicals with workplace exposures will result in reduced EPA burdens, more consistent workplace exposure control requirements, and an overall stronger regulatory framework.

 Hi Charlotte and Nancy,

Forwarding this meeting invite from Louise to let you know that this meeting is happening the day before our May 1 meeting, and to convey a welcome for either or both of you to join in you want to participate – especially since I’ve seen a cancelation for our regular check in which would have been on 4/27 (I was going to be out of town anyway). I’m confident we will be able to quickly go through the pieces so all aware of how things will be ready for May 1 event. Of course, also please let me know if you have any questions or anything else you need from us in regard to this meeting (e.g., you ok with the talking points, etc.).

Thanks,

Dear Internal Agency Review contacts,

As you know, in response to an urgent and priority request by the Administrator, OW/OST and ORD/NCEA have taken the lead to develop human health toxicity values for GenX and PFBS, respectively. These two assessments are expanding on existing work from OPPT (GenX) and ORD (PFBS). Some background information is attached. We will be offering an opportunity for rapid review of these assessments starting on 5/07/18. Please identify the expert reviewers in your region or program to prepare for this rapid review – you will have one week for this review, and each program/region is expected to provide one consolidated set of comments. The timeline is short as the Administrator has asked for these assessments and toxicity values to be prepared in a 6-month period including peer review. We are scheduling a conference call on or about 4/30/18 to provide an overview of the assessments and answer any questions.

The list of review coordinators for your organizations is below. Unless we hear from you otherwise, these individuals will be our points of contact for the review.

Please forward your questions to Ashley Harper. We will review and respond accordingly.

Thank you,

OW/OST and ORD/NCEA

**Time** 12:00 PM – 3:30 PM  
**Subject** OCSPP Managers' Meeting - Save the Date  
**Location** WJC East 1153  
**Show Time As** Free

New update – Our May 1 meeting will start with lunch at 12:00 (not 12:30); and, per the agenda, the working part of the meeting will still start promptly at 1:00 and end at 3:30 with a post-meeting social event for those who can stick around.

Dear OCSPP Managers,

I'm sending you this update to my previous invitation to provide you more information for our first Annual OCSPP First Line Supervisors Meeting on May 1. The OCSPP DAAs view this meeting as a critically important event in support of our OCSPP priorities. Please refer to the attached Agenda for meeting objectives, outline (including list of challenges/opportunities), and logistics (including suggestions for

staggered shuttle bus use from PY). While our expectation is that all OCSPP first-line supervisors will attend the entire meeting, we are also expecting that Division- and Office-level management will be present for at least the opening remarks (1:00 to 1:45). Also, we welcome all to participate in the pre-meeting pizza/salad networking appreciation lunch starting at noon! Importantly, we will be using acceptances to this meeting invite to ensure broad OCSPP participation and to give us a good sense of how much food to get. If you are planning to come to the meeting, but will be skipping lunch, please let your First Line Supervisor Forum Co-Lead know, so we can plan accordingly. The FLS Forum co-leads are Seema Schappelle-OSCP, Rachel Holloman-OPP, and Guy Tomassoni-OPPT.

Very much looking forward to your participation in this first line supervisor-focused, cross-OCSPP dialogue. Questions concerning this meeting can be directed to any of our FLS Forum Co-Leads (Rachel, Seema, or Guy).

Thank you,

Louise P. Wise

Deputy Assistant Administrator

Office of Chemical Safety and Pollution Prevention

**Location** DCRoomEast3156/DC-EPA-EAST-OCSP (Call in Number (b) (6), Access code (b) (6))  
**Show Time As** Busy

Briefing focused on expanded access to TSCA CBI to non-Federal persons and entities. OMB has determined an ICR must be developed for this guidance. The guidance will be published for public comment together with the draft ICR. Briefing proposed for May after OMB review and public comment has been received and reviewed by workgroup. Section 14 also requires EPA, in consultation with the CDC, to develop a “request and notification” system that allows for expedient and swift access to information disclosed under sections 14(d)(5) and 14(d)(6). No deadline is given for developing this system.

Good afternoon all –

We have a very full agenda for tomorrow afternoon (see attached).

Also attached for your convenience are the Action Items Table and the TSCA Section 14 CBI Update presentation slides.

Please take a moment to look at the Action Items Table before the meeting – especially to see if your office is identified as the lead for any items.

For the Measures Discussion:

\* P2 - Here is the general concept (specific language to change):

Measure: Number of significant actions taken by Regions to amplify and share P2 approaches with States and Tribes, business and industry groups and the general public through meetings, webinars, social media, development of fact sheets or case studies, press releases, presentations or speeches.

Target: # of significant outreach actions taken to amplify and share P2 results (each Region would project an annual number they will commit to, to be tracked on a monthly basis).

Actual: number of significant outreach activities each month.

\* Lead – the discussion will include an update and then center around setting targets.

Have a good evening!

 \* Paul Wenger, Wood Colony Nut Co: EPA requirement for a closed mixing system for paraquat herbicide

According to Tracey Chow in Denham's office, "Pruitt expressed that it could be resolved easily," and asked for more information which is included below.

As you'll see below, apparently Paul was supposed to meet with Ken Wagner, but I have no idea if that actually took place. If it did, Tracey made no mention of it to me when we spoke and did not forward me any of their correspondence.

 Subject: Fwd: Paraquat EPA

Hi Tracey,

Sorry for not getting this to you sooner as promised. Your email jogged my memory.

I found out about the USEPA edict to require a closed mixing system for paraquat when I was speaking at the CAPCA annual meeting in October. As I started asking around, no one really was aware except the registrants of paraquat and they felt they needed to stay silent on the issue as they were the regulated registrants. AFBF and others made cursory comments but no one who has ever actually mixed, loaded or applied paraquat. CFBF, CAPCA, Western Plant Health and other organizations I reached out to had no knowledge of this potential change to using paraquat.

As a background, CalEPA/ DPR has had a closed mix requirement for years. California had been the ONLY state with such a requirement for paraquat. County Ag Commissioners have long known there are zero, as in no, functionally adequate closed system for mixing most pesticides. About 7 or 8 years ago, I challenged DPR to the safety of closed mixing systems, when one ruptured on me when I was filling a ground sprayer. Pouring the product out of a gallon or 2 1/2 gallon container from the manufacturer, is clearly the safest way to use paraquat. DPR commissioned an extensive multi-year review and study, ultimately removing over 100 crop protection materials from the CA mandated closed system requirement and added about 10 products to the closed system requirement. Paraquat was one of the products removed.

USEPA unilaterally took on this review of paraquat. In reviewing the docket that was sent out in 2016, all poisonings were either from accidental ingestion when paraquat was put in a container like a soda bottle or from suicides. There were no incidences of accidental poisoning from farm or other intended uses.

Last October, I met with Yu Ting and another guy, who do pesticide registration review at USEPA. After discussing my issue with closed systems with them, the fact that there are zero commercially produced closed systems that work and you can't regulate "stupid", they agreed that finding a solution was more difficult than they thought it would be. From this forwarded email from Jay Vroom, you can see this has taken an extensive time, because the solution they are pursuing doesn't exist.

That is really their purpose and reason for this mandatory closed

system for “less than bulk mixing and loading”. Yu Ting told me paraquat was dangerous, outdated and shouldn’t be used any longer. So a lack of an effective closed mic system will drive growers to not use it, or use it illegally. Both are unacceptable results. With increasing glyphosate (Roundup) resistance, paraquat is critically important to controlling weeds.

They then told me that while this has become more complicated than they had anticipated, it was too late to go back. I challenged them by saying if new information becomes available that they can’t change course.

USEPA had no knowledge of the lengthy study Cal EPA/DPR did on paraquat, ultimately removing the requirement. At a meeting I attended, with DPR also in attendance, in San Diego with registrants and 10 companies trying to design a closed mix systems, it was clearly evident that only a PhD could make these devices work.....maybe. The DPR person was Harvard Fong, Senior Industrial Hygienist. He made the statement that USEPA was 10 years behind the times and they never outreached to Cal EPA/DPR.

I know this explanatory email is very lengthy, but just when we get the most liberal and regulation driven state to make a much needed change to our pesticide regulations after lengthy study and review, some individuals within USEPA arbitrarily make it their goal to restrict and hopefully diminish the utilization of paraquat by farmers and others.

All the points about training and use by certified applicators is fine. But the third item requiring a closed system on containers less than 120 gallons is ridiculous. So how do you pick up and pour a container larger than 120 gallons? Their goal here is very clear, regulate paraquat out of existence.

Again, sorry for the lengthy email on a Friday, but this issue is a great example of run-away regulation, driven by personal agendas.

Not sure if I should bring it up on Tuesday. I am planning another trip to DC and to hopefully meet with a Ken Wagner, who is supposedly in a position to help.

If you need more info, let me know.

See you Tuesday.

Paul

Paul—my colleague Ray McAllister pulled this together for your quick overview. Looks like the closed system concept is well embedded in their approach at EPA. I am amazed at how long the reg review docket has been open!

Excerpt:

Based on the high number and severity of human health incidents associated with the pesticide paraquat dichloride (also referred to as paraquat), the Environmental Protection Agency (EPA or the Agency) has determined the following risk mitigation measures are necessary in order for pesticide products containing paraquat to meet the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) standard for registration:

1. Label changes emphasizing paraquat toxicity and supplemental warning materials;
2. Targeted training materials for paraquat users;
3. Closed-system packaging for all non-bulk (less than 120 gallon) end use product containers of paraquat; and
4. Restricting the use of all paraquat products to certified applicators only (i.e., prohibiting use by uncertified persons working under the supervision of a certified applicator).

Subject: Re: ESA Working Group call

Thank you for your responses. Our suggested time for the working group meeting is 2:45-3:15 this Friday afternoon. Apologies for awkward time, but it's the only window where we could get coverage from all the agencies. If this is a no-go for any of the agencies, please let me know as soon as possible. Otherwise, please pencil this in and I will send out a meeting request tomorrow when I am back at CEQ.

Thanks,

Alex

Dear Working Group Members,

CEQ would like to schedule a brief meeting (by telephone) of the ESA Working Group. The purpose of the call is to provide an update on current efforts. If you have specific issues you would like to discuss, please let me know in advance of the meeting.

We are suggesting a roughly 30-minute call this Friday afternoon, May 18, sometime between 1:30pm and 4:00pm. Please let me know your availability during this window, so we can get something scheduled as soon as possible.

Thank you,

Alex

Colleagues,

As stated in our February 23rd memo  
 <[https://www.epa.gov/sites/production/files/2018-02/documents/epa\\_ej\\_memo\\_02.23.2018.pdf](https://www.epa.gov/sites/production/files/2018-02/documents/epa_ej_memo_02.23.2018.pdf)> , EPA is launching a new Environmental Justice and Community Revitalization Council (EJCRC). OP AA Brittany Bolen will convene our first meeting of this council on May 29, 2018. I ask that Assistant and Regional Administrators participate in this initial meeting, along with program staff from your organizations involved in EJ and community-based work. One of the first items we will discuss at this meeting will be the council's permanent membership and expectations for future meeting frequency.

The EJCRC will function as the Agency's central decision-making body for determining environmental justice and community-driven strategic priorities and guiding their implementation. The EJCRC will support the Administrator's goals of cooperative federalism and public participation in solving environmental challenges through locally led, community-driven solutions. The EJCRC will also support vulnerable communities in their efforts to grow, revitalize, and thrive by leading the integration and better alignment of the Agency's EJ and community efforts across our programs and activities. We would like to use this meeting to begin a conversation with EPA senior leadership on the most immediate priorities for these programs, which include

their involvement with the lead initiative, working with states and meeting communities at their needs.

Attached please find a draft agenda for this meeting. Should you have any questions or need any assistance in preparation for this meeting, please contact Alyssa Edwards (Edwards.alyssa@epa.gov <mailto:Edwards.alyssa@epa.gov> , 202-564-0473).

Environmental Defense Fund requests a meeting with you and other appropriate EPA staff to discuss OCSP's implementation of the requirements of the Lautenberg Act with respect to the assertion, substantiation, EPA review and determination, and public disclosure of information submitted to the agency that is subject to claims of confidential business information (CBI).

While we wish to discuss the issue broadly as it relates to both existing and new chemicals under TSCA, we are particularly interested in hearing from the agency how it is or intends to implement the law's requirements relating to:

- \* CBI claims in new chemical notices and associated information, and EPA's reviews of them; we have recently completed an in-depth analysis of about 70 PMN public files we received from EPA's Docket Center, and have identified what we consider serious, systemic deficiencies, detailed in a series of blog posts (<https://bit.ly/2JsyOoF> <<https://bit.ly/2JsyOoF>> );
- \* assignment of unique identifiers to chemicals for which the agency approves or receives CBI claims for specific chemical identity; and
- \* publication of EPA determinations on CBI claims it reviews.

We also would like to receive an update on EPA's plan and schedule for:

- \* making public an updated database of information collected under the 2016 cycle of Chemical Data Reporting (CDR) that includes all information the agency originally withheld in its initial release that is not eligible for CBI protection; and
- \* establishing a readily accessible means for the public to track the

status of EPA reviews of CBI claims, and where approved, understand the sunset dates associated with such claims.

Original: Ensure that the products of biotechnology that could have been produced through conventional breeding which pose no greater identified risk are treated no more stringently than those conventionally bred products.

EPA suggestion: Recognize that certain agricultural biotechnology products pose no greater applicable risk than their conventionally bred counterparts and should be treated no more stringently than those conventionally bred products.

EPA comment: EPA regulations currently require that “products of biotechnology that could have been produced through conventional breeding” and have pesticide traits must be regulated as pesticides under FIFRA and FFDCA. Thus suggested edits. We are still working through the range that those products take up and considering rulemaking to ensure that they are treated no more stringently than similar conventionally bred products. However, EPA’s range for these products may be different than what USDA has communicated since EPA must consider food safety for plant-incorporated protectants.

Hello everyone –

Please see additional attachment and short summary below  
pertaining to discussion on P2 Priorities:

Short summary of discussion: Issue under consideration: Given the authorities and mandates of the Pollution Prevention Act of 1990, and on-going Congressional direction for EPA's P2 program (via appropriation for FY2018 and early drafts of FY2019), how can EPA's P2 leadership in HQ and Regions best align the program with the EPA Strategic Plan and elements of the Presidential Budget (which proposed elimination of the program in FY2018 and continues the proposal for FY2019)?

**AGENDA:**

1. Roll call – Vickie Pane (5 minutes)

\* PCB Needs Assessment status

\* September In-Person

2. Budget update – Greg Scott (5 minutes)

3. P2 Priorities – David Widawsky (10 minutes)

4. TSCA Deadlines Update – Jeff Morris (10 minutes)

5. PENTA Update – Anita Pease (5 minutes)

6. OPP ECR Device Decisions – Ed Messina (20 minutes)

**Questions:**

\* What is the current docket of Stop-sale orders?

\* How informed are the regional and HQ program offices about these in advance?

\* What does that process look like?

\* How does the ECR process play into this?

\* How does the device/pesticide determination process play into this?

\* The resource implications for Regional and OPP review?

7. Round Robin – Regional updates – all (remaining time)

Subject: Speaking with someone Monday about epidemiology and  
pesticide decisions

I wanted to talk with someone at EPA about how epidemiology is used  
in pesticide decisions. I have read the attached document.

I wanted to ask questions like

1) How useful is epidemiology in pesticide decisions and why is it  
important, if you thin it is

2) CropLife in Nov. 2016, see below, filed a petition asking EPA to “halt  
regulatory decisions that are highly influenced/determined by results  
of epidemiological studies that do not meet well-defined data quality  
standards, and that are not integrated into the health risk assessment  
in a transparent, well-defined manner.” Any interim or final  
registration review decision for Phosmet could potentially be  
impacted by EPA consideration of the epidemiological studies  
identified in the CLA petition. What ended up happening with this

3) How would the Strengthening Transparency in Regulatory Science  
proposal impact, if at all, your ability to use epidemiology in pesticide  
decisions, and if not, why not.

4) I also have questions about organophosphates, including making sure I understand what the 10X debate is about, and what the timeline is for reevaluating this class of pesticides and where the agency stands on health impacts and potential use of epi studies for this effort.

I really hope we can discuss all of this without just getting formal written responses to these questions. Let me know if we can have this conversation on Monday. It could be a mix of on the record and on background.

This is a case where the story is not yet drafted and we want your input in advance to help influence the story.

Thanks in advance

Eric

 Meeting Description

\* Review the portfolio of BPPD’s Environmental Stewardship Branch and how it is responsive to EPA’s integrated pest management (IPM) charge under FIFRA/FQPA as well as supportive of the division’s PRIA efforts. Learn how this branch promotes IPM to a variety of stakeholders in mosquito control districts, schools, health departments, agriculture, and homes. Learn how the EPA Regions and long-standing relationships with non-profit organizations are used to further disseminate the message about IPM as part of a sustainable, healthy environment. Additionally, an overview of BPPD’s draft IPM strategy will be shared.

Expected Outcome

\* Clearance to provide IPM strategy for DAA review and agreement and, subsequently, clearance for OPP to share the draft strategy with the Regions to secure their buy-in and guide their IPM implementation and outreach efforts.

Subject: possible informal meeting during July

Nancy and Jeff –

I am interested in scheduling a meeting with the two of you soon, so we can confer and bring you up to date on the considerable progress that is being made on certain new chemicals issues.

Among the clients I represent, I am fortunate to work with the Semiconductor Industry Association. SIA includes the major US manufacturers of semiconductors (“microchips”) that are components of numerous electronic devices. That industry works closely with its suppliers, who are manufacturers and processors of various sophisticated chemical substances and mixtures that are critical to “chip” making. Such substances are unique and highly specific in their composition and properties; consequently, new chemicals often are being developed to suit specific technologies.

Among the substances used in these processes are Photo-acid Generators (PAGs) which are used in photolithographic processes to layer various surfaces on microchips. Last year, SIA and its suppliers voluntarily formed a Consortium to address certain issues that had been arising in the context of the Agency’s review of PAG substances that are submitted as new chemicals (in LVEs and PMNs).

Approximately one year ago, the two of you met with a delegation from SIA and its core group of suppliers to discuss the New Chemicals Program's approach to new chemical PAGs. (The meeting occurred in May 2017, just as Mark Greenwood was retiring from his practice – while he was transitioning this client to me.) In the intervening period, we have made great strides as the PAG Consortium has worked collaboratively with New Chemicals Program personnel on a structured agreement by which our members are supplying certain information to EPA reviewers and will be generating new data on representative PAG substances to submit to EPA.

We think this would be a good time for you to become more acquainted with SIA's role, how its industry depends on the availability of innovative new chemistries, and report on how the PAG Consortium is continuing to work with EPA personnel to further the Agency's objectives to obtain a more robust data profile on this category of substances.

If we could find mutually convenient dates during the middle two weeks in July (the weeks of July 9th and 16th) that would be ideal. I realize your schedules are jammed packed; thus, an informal meeting is being sought. We would bring with us only a handful of SIA personnel, one or two representative members, and a "supplier" representative.

I would be pleased to contact your respective schedulers to seek an appropriate date.

Larry

Per attached: We would like to provide you with an introduction to the \$82 billion professional lawn care and landscape industry, and discuss the vital role our professionals' work does to help families, communities, and the environment. The meeting would offer an opportunity for you and your team to receive input on issues that impact professional lawn care applicators, such as continued access to products that allow them to maintain healthy lawns, certification and training, Endangered Species Act compliance, adequate funding for the Office of Pesticide Programs, and the efficient use of water.

The National Association of Landscape Professionals is the national trade association representing nearly 100,000 landscape industry professionals in the United States. Member companies specialize in lawn care, landscape design and installation, landscape maintenance, tree care, irrigation and water management, and interior plantscaping. If you have any additional agenda items you would like to add to the draft agenda below, please provide these to me by early next week.

Thank you!
