Dr. George S. Handler
WESTINGHOUSE ELECTRIC COMPANY
Westinghouse Research Laboratory
Chemical Department
Pittsburgh 35, Pennsylvania

Dear Dr. Handler:

Your recent verbal request to our Dr. H. Podall at the New York A.C.S. Convention has been forwarded to me.

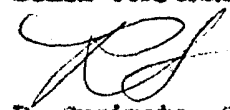

Accordingly, we are sending you five grams each of tetramethyllead, tetraethyllead and tetra-n-propyllead. Our supply of tetrabutyllead is exhausted at the present time and plans to prepare this compound are somewhat vague at the present time. However, we should have samples available within four or five months.

In accordance with our safety regulations, we are enclosing a booklet pertaining to our precautions for handling organic lead compounds in laboratories and a release concerning the use of the material. Would you please sign and return the latter to us promptly.

Please do not hesitate to advise this office if we may render our services at some future date.

Very truly yours,

ETHYL CORPORATION

R. Sugimoto, Supervisor
