

This catalog contains listings of brake linings used on current passenger cars, light and medium size trucks.

The VELVETOUCH METALIK lining sets listed are made of powdered metal lining segments — bonded to quality-reconditioned shoes — with a special high-temperature adhesive. These are used primarily on the passenger cars and light trucks.

VELVETOUCH SAFTI-SETS — for medium size trucks — differ in that they are supplied as a boxed set of lining only. Each set consists of four pieces of VELVETOUCH ORGANIK drilled lining and four — all metal VELVETOUCH FERAMIC drilled segments. One piece of ORGANIK lining and one FERAMIC segment are riveted to each shoe. USE VELVETOUCH STEEL RIVETS. VELVETOUCH SAFTI-SETS offer a higher stable friction for the larger and heavier trucks. Due to the all-metal composition, SAFTI-SETS are fade free under hot or cold conditions and are impervious to water.

Refer to pages 15 through 20 for additional information on the installation of the VELVETOUCH METALIK and SAFTI-SETS.

WARRANTY

Seller warrants its products sold hereunder to be free from defects in material and workmanship under normal use.

It is expressly agreed that no warranty of merchantability, nor any other warranty, express or implied or statutory, is made by the seller hereunder. Seller's entire and exclusive liability, whether founded on warranty, contract, negligence or otherwise, and buyer's exclusive and sole remedy hereunder, is limited to repair or replacement of defective goods, F.O.B., our factory, or at seller's option the return of the purchase price. Seller will in no event be liable for any special or consequential damages whatsoever.
