YOUR STUCCO HOUSE NEED PAINT?... THEN REMEMBER—

A PAINT BRUSH

has a handle too...

Dutch Boy white-lead is sold by paint dealers everywhere.

It is important that you consider the handle end of a paint brush, as well as its bristle end, when you have painting done on stucco or any other surface. To insure the right kind of job, you need both a master painter and good paint such as pure lead paint.

The master painter and pure lead paint are a time-tried partnership. For a hundred years and more, master painters have built reputations for fine work with pure lead paint... and enabled property-owners to get the utmost for their paint money.

Pure lead paint, made with Dutch Boy white-lead, covers stucco with a beautiful, durable film that does not crack or scale... that prevents cracking of the stucco surface by keeping out moisture. With this paint, the master painter can give you the finish you prefer—gloss, eggshell or flat—and also the exact color you desire. It is mixed and tinted by him specially for each job.

Write us for detailed information about using pure lead paint on stucco. Also request a new booklet on painting, "The House We Live In," which aids in the selection of interior and exterior color schemes.
