### *Old Dutch Process White Lead*

S-W ODP White Lead is a Strictly Pure White Lead, made from the very best raw materials obtainable, and according to the Old Dutch Process combined with the best features of the American manufacturers. We corrode, clean, and grind our own lead, combining it with Linseed Oil, also of our own manufacture. With this control of raw materials, and all the following processes carried out by ourselves, we have a great advantage over many other manufacturers who are compelled to buy materials on the open market.

Sherwin-Williams Old Dutch Process White Lead compels the recognition of its merits by every experienced master painter who knows the "Feel of Good Lead," as soon as he touches it. It has color, texture, reducing qualities, opacity, covering power, and easy working qualities that satisfy every painter. A guarantee appears on every package which is in itself, a proof of the quality of the product. In specifying a White Lead, specify S-W ODP.

PURE  
LEAD

GUARANTEE

"This package is warranted to contain nothing but Strictly Pure White Lead, ground in Strictly Pure Linseed Oil, and we will pay one ounce in gold for every ounce of adulteration that is ever found to contain."

ODP White Lead is put up in strong, steel kegs, which protect the lead much better than the old-fashioned wooden packages, as the steel keeps out moisture and air, and does not absorb the oil. The lead is always as fresh, and in as good condition, as when it left the mill.

When empty, the steel packages are easily cleaned, and may be put to a hundred different uses in the paint-shop or around the house.

Old Dutch Process White Lead is sold in 1, 2 and 5-pound tin packages, 12½, 25, 50 and 100-pound steel containers; also 300 and 500-pound barrels.
