

cc: IC 13
Date: September 10, 1980

TO: R. D. SNEE

MANUSCRIPT - Subject: MODELS FOR THE RELATIONSHIP BETWEEN BLOOD LEAD
AND AIR LEAD

For delivery to: --

For publication in: AIR POLLUTION CONTROL ASSOCIATION JOURNAL

Place: --

Date: WHEN ACCEPTED

The attached manuscript, with indicated changes, is approved as noted only - for ☐ delivery ☐ preprint ☒ publication.

It will be your responsibility to forward a copy of manuscript, together with attached memorandum completed in necessary detail, to the Publications Unit, Louviers 1111, immediately following delivery of speech or publication of paper. This information is necessary for cataloging and for maintaining the ENGINEERING DEPARTMENT SPEECH REFERENCE FILE in IC 13. Slides, film, or other compact visual aids should be forwarded to Information Center 13 for filing and retention.

The Personnel Development Section offers assistance in the preparation of speeches or papers, coaching in speech presentation, and consultation on visual aids.

Even though papers include no proprietary Du Pont information, problems can arise if there are opportunities for questions. Questioners frequently try to obtain confidential information. Sometimes a moment's hesitation or refusal to answer a question can reveal useful information. A well-thought-out approach to possible questions can prevent problems in this area.
