

Above: Lead-Lined Treating Drum, 10' x 20'.

HOMOGENEOUS LEAD-LINED EQUIPMENT

Under our most modern method of Lead-Lining there is no possible separation of Lead from Steel. You can clamp a strip of our Lead-Covered Steel in a vise and twist it until the Steel fractures, but there will be no parting of the metals. You can fold and re-fold the strip and pound it into a shapeless mass, and there will be no let-go of the lead.

Construction by these methods means everything to correct and long-time function of equipment under heaviest service conditions — proof against vibration, shock, impact, thermal extremes or other forms of punishment. Likewise, we Lead-

Lead-Covered Copper Heating Coils

Cover any desired piece with equal facility and permanency.

Consider these factors of excellence in connection with present and future needs.

LEAD-LINED and HARDLEAD FITTINGS

"United" Products, including complete lines of Chemical Lead - Lined Pipe, Fittings, Valves, Coils, Tank Connections, etc., as well as Hardlead Acid Pumps, Fittings, Valves, Cocks, etc.
