

## Hooker Chemicals & Plastics Corp.

PVC RESINS DIVISION  
PVC FABRICATED PRODUCTS DIVISION

P.O. Box 699 • Armand Hammer Blvd. • Pottstown, PA 19464  
215 / 326-2000

April 6, 1982

Mr. H. Rzempoluch, Plant Manager  
Pantasote Inc.  
State Route 62 North  
Pt. Pleasant, W. Va. 25550

Dear Henry:

Here are more agenda suggestions from the PVC Resins Division of the Hooker Chemicals & Plastics Corp.:

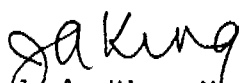

1. What equipment is used for abnormal vessel entry for self contained breathing air supply?

Same question for digging out set-up batches?

2. What is practice in coding piping for easy Operator identification of that containing carcinogens?
3. Hooker's Pottstown plant uses the OM 325 Oxygen Detector for monitoring in vessel cleaning procedures (see Attachments marked **A**).  
Problems are being experienced with the sensors of this unit for reasons unknown. What devices are used by others and what are their problems?
4. Will the meeting committee consider polling the membership before the Sept. meeting on the interaction with State regulators? A suggested questionnaire marked **B** is enclosed.

Very truly yours,

HOOKER CHEMICALS & PLASTICS CORP.

J. A. King, Manager  
Environmental Compliance

JAK/rm
