NEW YORK February 21, 1930.

INTER-OFFICE
CORRESPONDENCE

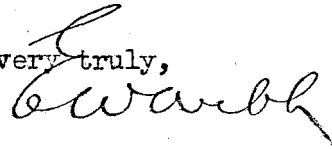

Dr. Robert A. Kehoe,
College of Medicine,
Eden & Bethesda Aves.,
Cincinnati, Ohio.

Dear Dr. Kehoe:

Enclosed is original letter of Dr. George F. Carroll to the Standard Oil Company of Louisiana which has been forwarded to me by Mr. Bedford of that company, together with copy of his letter and my acknowledgment.

Please handle this in such way as you think best, communicating either directly with Dr. Carroll or through this office. What do you think of this suggestion: that you write Dr. Carroll and send the letter to us--or you write me a memorandum which would enable me to reply to his inquiry--and that I should turn the letter or memorandum over to our representative in that territory and have him call on Dr. Carroll and see if he can find out the purpose of the inquiry before enlightening him on the subject of his request.

Yours very truly,

A:H

Dear Sir:

I am enclosing original letter received
by our New Orleans office from Dr. George F.
Carroll, a physician of Biloxi, Mississippi.

We thought that it would be proper
for someone in your organization to answer this
letter and we have, therefore, made no reply.

Yours truly,

Gentlemen:

Can you give me information relative to the action of Ethyl gasoline on the skin, eye and air passages when handled carelessly? Have you had any instances of hyper-susceptibility in operatives handling this product? If so, what is the reaction, clinical picture etc. as to the effect upon skin, eye and air passages.

I will greatly appreciate this information.

Sincerely yours,

George F. Carroll
