DOCUMENT DESCRIPTION: Internal Notes - Handwritten

—CD-5—

Yes there are problems & no - we don't comply;

1st - let me assume our Contractors are reviewing these standards and coming by we will officially inform them they must comply.

2nd we've been using Unibestos (the worst damn dust anyone) but it is going off the market. When I believe we will be using Polk's. Hummels & Dwyer which is somewhat better.

3rd CRL & NWE say we shouldn't (& don't plan) to use "Caterdory". Again also little problem there. Polk's we should put out memo to Hummels Supervisors & Hummels saying don't use Caterdory or power same w/o checked from CRL.

4th This year O.D. says hand & power tools should be provided with local exhaust ventilation & dust collectors. I don't see how you provide these on a hand saw & I don't see the need in the field.

5th This O.D. requires much more use of respirators - and as when breathing off material. In some instances pressure supplied respirators are indicated. I suspect Softy review in Sep. O.D. as a review to all work people.

6th We don't mix in closed bays or called for.

7th We don't bag waste or called for.

8th We don't vacuum or called for & I'm sure we dry sweep which is taken.
