The 1983 SHAC will meet at the Quality Inn on Wednesday, February 2, beginning at 0900 hours. Gene Tromblee will give us his guidance for the 1983 safety program. Following Gene's presentation, we will spend the remainder of the day setting goals and developing an action plan. We will have lunch at the Quality Inn.

As we discussed yesterday, please be thinking of and be prepared to discuss, safety and housekeeping concerns that you may have and projects to address them. We want to give special emphasis to those concerns that have the greatest potential of resulting in injury or serious incidents. Therefore, ranking your concerns prior to the meeting will save time.
