

INTER-OFFICE LETTER

FROM

Cleveland

OFFICE

Auxiliaries

DEPT.

FOR Coffeyville #30 OFFICE

DATE August 27, 1958

MR G. F. Wyman

SUBJECT New Jersey Zinc Co. - PERSONAL

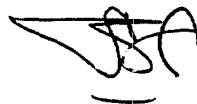

ANSWERING LETTER OF

DICTATED BY

I am attaching hereto copy of letter I received this morning from the above together with the enclosures mentioned.

If you have any questions at all regarding this, please get in touch with them before placing the order, but I think this makes everything clear.

Let me know later when we might expect delivery so that I can so notify New Jersey.

S.B. Coolidge, Jr.:mek

Revised Dec. 20, 1957 to provide for use of Label No. 326 for all grades of Lehigh Leaded Zinc Oxide to all destinations. Label No. 200 to be discontinued when present stock of printed bags is exhausted.

Rm

WJ
KRS

PERSONAL

Mr. S. B. Coolidge, Jr., Vice President
Director of Auxiliaries
The Sherwin-Williams Company
101 Prospect Avenue, N.W.
Cleveland, Ohio

Dear Sol:

Confirming our telephone conversation of August 21st, we propose to call the leaded zinc oxides "Zinc Compounds." Zinc Compound No. 1 will be the 18% leaded and we will designate it as Lehigh Leaded Zinc Oxide No. 118. The 12% leaded will be called Zinc Compound No. 2 and we propose to designate it as Lehigh Leaded Zinc Oxide No. 112.

If you can arrange to do so, we would like to have the material packed in red dyed Kraft bags similar to those we are now using on our present Lehigh Leaded Zinc Oxide. I am enclosing an empty bag of our Lehigh-01 which will show you the character of the dyed Kraft and also give you the dimensions and the placing of the numbers.

Our Lehigh plates for printing the bags are flat bed plates and not suitable for use by the bag manufacturer. He will therefore have to make up his own plate. We are enclosing a black and white printed Lehigh plate which we understand is what he needs to permit him to make his plate. So that you may have the complete file in this matter, we are also giving you a copy of our specification for the Lehigh label which is dated June 19, 1951.

At the present time we continue to estimate that we will sell in the approximate ratio of 1 ton of Lehigh Leaded Zinc Oxide No. 118 to 1 ton of Lehigh Leaded Zinc Oxide No. 112.

Mr. Kenly is clearing the letter form of agreement with our Legal Department and will probably forward it to you in the course of the next several days.

At this moment it looks as though the initial quantity of material that we will want put into warehouses will be between 500 and 600 tons. However, I would like to wait until next week to give you that final figure and to wait until about September 15th to give you the exact tonnage at each of the several warehouses that we will use.

I believe this covers the principal points that are needed for immediate action. We have received your letter of August 20th with the brochure on Ozlo 18M. We will appreciate receiving the comparable information on 12% leaded zinc.

Best regards,

Very truly yours,

G. F. A. Stutz
Manager
Pigments Division

GFAS:M
Enc.

P.S.

You will note that the plate does not carry the printed warning clause shown on the specification. Will you arrange with the bag manufacturer to include this printing as shown on the label specification.

G.F.A.S.
