However, it is not at all certain that 30,000 ppm will not be the upper level of a future recommendation.

A committee was named to compose of R. N. Wheeler, Union Carbide; N. G. White of Shell; and B. M. Zwicker of B. F. Goodrich to come up with firm recommendations.

CONCLUSION

Our industry is facing a serious problem because of Viola's publication and possible future publications. A carefully planned and logical animal study in the United States is deemed necessary. Dr. Viola's findings, at present, are subject to improper interpretations.
