Dear Mr. 5.1.2e

Thank you very much for inform me of this seminar. I will share this information with my members. We will definitely file some question prior to the seminar.

I heard that now your group is conducting studies for different categories and part of these studies will be done by consultants. We have close contacts with our downstream users. If you need any support to reach them or to get information from them or us, do not hesitate to indicate to your consultants to contact me.

Kind regards,

5.1.2 5.1.2e

PlasticsEurope is one of the leading European trade associations with centres in Brussels, Frankfurt, London, Madrid, Milan and Paris. We are networking with European and national plastics associations and have more than 100 member companies, producing over 90% of all polymers across the EU27 member states plus Norway, Switzerland, Turkey and UK. The European plastics industry makes a significant contribution to the welfare in Europe by enabling innovation, creating quality of life to citizens and facilitating resource efficiency and climate protection. Over 1.6 million people are working in close to 60,000 companies (mainly small and medium sized companies in the converting sector) to create a turnover of more than 360 bn EUR per year. The plastics industry includes polymer producers - represented by PlasticsEurope, converters - represented by EuPC - and machine manufacturers - represented by EUROMAP. For further info see the web links: www.plasticseurope.org, www.plasticsconverters.eu, www.euromap.org

Dear Mr 5.1.2e

I would like to inform you that in the follow-up phase of the CfE, the REACH competent authorities of the five Member States, Germany, the Netherlands, Norway, Sweden and Denmark, will be hosting a Webinar on 29 October with assistance of ECHA in order to explain the REACH restriction process and status of the proposed PFAS restriction. (please see <https://echa.europa.eu/-/restriction-of-per-and-polyfluoroalkyl-substances-pfas-under-reach>)

The webinar will be published on ECHA's home page on 29 October at 13:30 CET, GMT +1 and further instructions for joining a live Q&A session where experts from the 5 Member States will be answering your questions until 15:30 CET will be available there as well. You are welcome to send in any questions you might already have in advance of the meeting till 19 October to 5.1.2e@baua.bund.de.

Kind regards,

Dear Mr 5.1.2e

Thank you for your email. I appreciate the responses we received during the Call for evidence. As indicated by 5.1.2e we will organize follow-up meetings with stakeholders.

I will contact you if I have more information.

Kind regards,

5.1.2e

Subject: Interest to meet with you to exchange on our submission to your PFAS Call for Evidence

Dear Mr. 5.1.2e Mr. 5.1.2e

I am writing you on behalf of the Fluoropolymers Product Group.

Further to recent contact with 5.1.2e (BauA), I understand that you will meet shortly to discuss which specific stakeholders you would like to have further information. I would like to confirm our interest for such exchange with you and your colleagues of the 4 other REACH competent authorities, at your convenience. We would like to answer to your questions on our submission and/or any further questions you might have.

Along with our group response, each of our members replied also individually to your "Call for Evidence supporting an analysis of restriction options for PFAS". We have been active in supporting downstream users and other interested parties to submit evidence. Therefore, we welcome engagement with the competent authorities, ECHA and the EU institutions.

As you might know the Fluoropolymers Product Group represents Europe's leading fluoropolymer producers and experts. Our members are committed to promoting innovation, safe use of their products, sustainable manufacturing and stewardship across the industry. Part of PlasticsEurope, the Group's members include Europe's fluoropolymer producers, namely, 3M, AGC, Arkema, Chemours, Daikin Chemicals, Gore and Solvay.

For your information, fluoropolymers, which include fluoroplastics and fluoroelastomers, are durable materials, whose chemical and thermal stability, together with other unique properties, are key to their use in numerous high-tech applications. Many of these properties are critical for human safety and health.

I look forward to hearing from you shortly.

Yours Sincerely,

5.1.2 5.1.2e
