LEAD PIPE

What about price?

Yes, lead pipe at times, depending on market conditions, is more expensive. Why shouldn't it be? Consider the advantages of lead pipe and price ceases to be an issue worthy of attention.

You can install lead pipe easier and faster and it is cheaper for you to handle both in your shop and on the job.

When your customer mentions that lead pipe is more expensive do not make excuses for it. Lead Pipe is worth every penny charged for it.

It may be a few cents more in cost but it gives years more in service.
