and every exposure to those products contribute to the development of a mesothelioma because there is no safe level of exposure for that disease.

Now, you might hear that this all came after the case was filed, after the lawsuit was filed, and you might hear that from Mr. Williams, but when you hear that or if you do hear it, take a look at Mr. Grewe's medical records.

Because back in November of '92 before there was any lawsuit, this is a 54-year-old white male in previous good health, worked as a mechanic with exposure to brake lines for asbestos exposure.

That is where his exposure came from. It is replete and throughout his medical records, and it is recorded in the medical records because they take an occupational history when they see that disease mesothelioma, the signal tumor.

Mesothelioma, asbestos exposure.

November 29th, 1992, presented with shortness of breath and chest pain. Exposed to asbestos in his work as a car mechanic. Again, they
