Subject: Asbestos Labeling

Dear Dick:

Upon the advice of our Insurance and Legal Departments, we are making arrangements to make the following changes the next time Sprayon bags are printed. These changes would be in only the Sprayon products where asbestos is used. The printing will include a reference to a new caution label pertaining to asbestos.

OLC

CAUTION: This product contains asbestos

KW

"CAUTION"

"One of the ingredients of the material in this bag is asbestos and persons exposed to dust that contains asbestos should take adequate precautions as inhalation of asbestos fibres may be harmful."

We ask for your formal approval of this procedural change.
