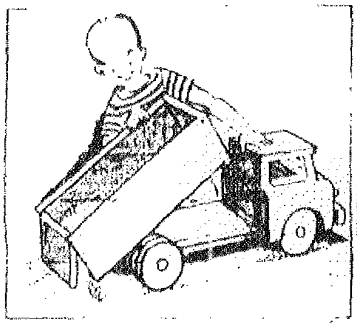
ARCHITECT'S Sketchbook

by HALL MEYERRIECKS



WOODEN TOY LASTS FOREVER There's nothing fancy about this dump truck. It looks like a real workhorse and it dumps its load like the real thing. There's nothing to get out of whack and many of the parts can be cut from scrap. To order the easy-to-follow plan, fill in the blanks below, cut out this coupon and mail with 50 cents to SKETCHBOOK, in care of this newspaper.

Gerbera Ready For Planting

Gerberas, or "Transvaal Daisy" as it is commonly known, is one of spring gardens most exciting perennials. The tall, daisy-like flowers do well in most regions except in the cool of long, coastal areas. In the warmer areas, they bloom from spring to fall.

Gerbera may be planted from seeds or from potted plants. Prepare soil well in advance of planting time. Add plenty of humus and sand to the soil to improve drainage. Plant the crown of the plant at soil level. Space the plants 12 to 18 inches apart. Gerbera is a beautiful flower for cutting.

SAVE SPACE FOR FUTURE DISHWASHER

A modern built-in electric dishwasher usually is one of the last appliances called for in kitchen remodeling. But, if for some reason its purchase must be postponed, families should plan to make its future installation as simple and inexpensive as possible.

The key is to provide a convenient space next to the sink for which a dishwasher can be installed when the family decides it's time to afford it.

During the remodeling or building, the necessary plumbing and wiring can be installed, and the space marked "reserved" for the dishwasher can be filled temporarily with a useful cabinet.

The cabinet will provide additional counter surface and storage room. Dishwasher manufacturers have many models designed to fit neatly into a standard cabinet space.

YOUR CHOICE

	ECONOMY PAINTS	QUALITY PAINTS
