

# P-1 for 10 6-18-81 DFB MATERIAL SECTION INDEX

## THERMAL INSULATION STANDARD ENGINEERING SPECIFICATION

ISSUED JULY 1978  
THIS PAGE REVISED SEPT 1979  
STANDARD REAFFIRMED SEPT 1979

SN 1 M  
Page 1 of 14

### 1. SCOPE

This specification contains two alphabetical listings. One is by vendors, brand name, and Du Pont code; the other is by brand name, with vendor and Du Pont code.

### 2. GENERAL

2.1 The materials listed have proven satisfactory in field tests and proof has been furnished by the manufacturers that their products meet the specifications of the code under which they are listed. These manufacturers'

materials are acceptable under other vendors' labels upon certification as to their identity.

2.2 For reference by vendor, see Table 1.

2.3 For reference by brand name, see Table 2.

2.4 For detailed description, specifications, and limitations of a specific material, refer to the respective Du Pont code in the SN-M section.

2.5 Common materials are listed generically under the vendor heading "Applicator or Distributor."

TABLE 1 - VENDOR, BRAND NAME, AND CODE

| Vendor                    | Brand Name                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Material Designation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Code                                                                                                                                     |
