STATEMENT NOTE: An effective hearing conservation program shall include, at a minimum:

- 1) A baseline audiogram for all employees exposed to noise levels equal to or in excess of the standard.
- 2) Periodic audiograms for each overexposed employee.
- 3) Analysis of audiogram results with retesting and/or referral to an otolaryngologist or qualified physician when a significant threshold shift occurs. A significant shift will be considered to be equal to or greater than 20 dB at any test frequency.
- 4) Where insert ear plugs or custom-molded devices other than self-fitted, malleable plugs are utilized, individual employee fitting shall be conducted by a trained person, and employees shall be instructed in the care and use of the devices.

The combination of the above alleged violations affected the overall gravity of possible illness and contributed to the serious nature of the alleged violation.

Step 1 - Effective personal hearing protection shall be provided and used by employee(s) as an interim protective measure.

Step 2 - Submit to the Area Director a written detailed plan of abatement outlining a schedule for the implementation of engineering and/or administrative measures to control employee exposures to noise as referenced in this citation. The plan shall include, at a minimum, target dates for the following actions which should be consistent with the dates required by this citations:

- a) Evaluation of the extent and location of the hazard sources;
