So. Salem, New York 10590

Dear Mr. Strauss:

Confirming our conversation, all Lucite® indoor housepaints would be safe for use on childrens toys as described in the American Standard Specification Z66.1-1964. However, not all Lucite® outside housepaints would be considered safe from a toxicological point of view.

I am sending a copy of Z66.1-1964 for your information. If you need further assistance, please let me know.

Very truly yours,

William W. Miller
Toxicity Coordinator
