

Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Attached please find the request of the National Lime Association (“NLA”) that the President issue a two-year exemption from the current July 16, 2027, compliance date of emissions standards promulgated in the final rule *National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants Technology Review* (the “Lime Rule”), published in the *Federal Register* at 89 Fed. Reg. 57,738 (July 16, 2024), extending the compliance date to July 16, 2029, for each major source lime plant subject to the rule (listed in the attached document), pending EPA’s reconsideration of the rule. The attached document explains which emissions standards are subject to the request and contains a list of the affected sources. It also provides a justification to support the request, including an explanation why the technology to implement the standard is not available, and an explanation of why an extension is in the national security interests of the United States. It also contains letters from the affected sources authorizing NLA to file this request on their behalf.

Thank you for your consideration of this request.

William C. Herz
Executive Director
National Lime Association
